### THE POWER OF STEAM

The i700B produces 70 PSI of steam pressure and reaches temperatures up to 221° F at the tip. It's ideally suited for use in dental labs for cleaning away left over wax, plaster waste and other debris, and for polishing the final product.

### WHY CLEAN WITH STEAM?

Steam deodorizes and sanitizes with heat and moisture and since the only ingredient required for the i700B is water, cleaning has never been safer, healthier or more environmentally friendly.
